Dear Dr. McAllister,

Please find enclosed a copy of the Program for the first American Society for Cell Biology Summer Research Conference "Analytical Approaches for Receptor Biology," to which your company kindly donated funds.

The conference was most successful, attracting 168 participants representing the United States and eight foreign countries. Thirty-three Young Scientists who attended were recipients of awards from the Society covering partial conference costs. The scientific sessions covered a discussion of receptor structure, methods of receptor purification and reconstitution, signal transduction, and receptor transport within cells. In addition, posters were presented by participants. Almost all the participants were highly enthusiastic about the conference and many look forward to attending another in future years.

We thank you for your interest and support of this conference and for helping us assure high conference standards and a quality program.

Sincerely,

Dorothea C. Wilson  
Executive Officer
